Legal Disclosure & Disclaimer

This presentation includes forward-looking statements within the meaning of the Private Securities Litigation Reform Act that reflect our current views with respect to, among other things, our operations, business strategy, interpretation of prior development activities, plans to develop and commercialize our products and services, potential market opportunity, financial performance and needs for additional financing. We have used words like "anticipate," "believe," "could," "estimate," "expect," "future," "intend," "may," "plan," "potential," "project," "will," and similar terms and phrases to identify forward-looking statements in this presentation.

The forward-looking statements contained in this presentation are based on management's current expectations and are subject to substantial risks, uncertainty and changes in circumstances. Actual results may differ materially from those expressed by these expectations due to risks and uncertainties, including, among others, those related to our ability to obtain additional capital on favorable terms to us, or at all, the success, timing and cost of ongoing or future operations, the lengthy and unpredictable nature of the project development, and technology process and businesses in which we currently engage or may engage.

These risks and uncertainties include, but may not be limited to, those described in our filings with the SEC. Forward-looking statements speak only as of the date of this presentation, and we undertake no obligation to review or update any forward-looking statement except as may be required by applicable law.

The material in this presentation has been prepared by Soluna and is general background information about Soluna's activities, current as at the date of this presentation and is provided for information purposes only. It should be read in conjunction with Soluna's periodic and continuous disclosure announcements filed with the Securities and Exchange Commission. This presentation provides information in summary form only and is not intended to be complete. Soluna makes no representation or warranty, express or implied, as to the accuracy, completeness, fairness or reliability of any of the information, illustrations, examples, opinions, forecasts, reports, estimates and conclusions contained in this presentation. It is not intended to be relied upon as advice or a recommendation to investors or potential investors and does not take into account the investment objectives, financial situation, taxation situation or needs of any particular investor. Due care and consideration should be undertaken when considering and analyzing Soluna's future performance and business prospects. THIS PRESENTATION IS NOT INTENDED TO SERVE AS A FORECAST OF ANY SUCH FUTURE PERFORMANCE OR PROSPECTS. An investor must not act on any matter contained in this document but must make its own assessment of Soluna and conduct its own investigations and analysis. Investors should assess their own individual financial circumstances and consider talking to a financial adviser, professional adviser or consultant before making any investment decision. This document does not constitute an offer, invitation, solicitation or recommendation with respect to the purchase or sale of any security in Soluna nor does it constitute financial product advice. This document is not a prospectus, product disclosure statement or other offer document under United States federal or state securities law or under any other law. This document has not been filed, registered or approved by regulatory authorities in any jurisdiction.

This presentation contains statistical and market data that we obtained from industry publications, reports generated by third parties, and third-party studies. Although we believe that the publications, reports, and studies are reliable as of the date of this presentation, we have not independently verified such statistical or market data.

Any projection, forecast, estimate or other "forward-looking" statement in this presentation only illustrates hypothetical performance under specified assumptions of events or conditions that have been clearly delineated herein. Such projections, forecasts, estimates or other "forward-looking" statements are not reliable indicators of future performance. Hypothetical or illustrative performance information contained in these materials may not be relied upon as a promise, prediction or projection of future performance and are subject to significant assumptions and limitations. In addition, not all relevant events or conditions may have been considered in developing such assumptions. READERS OF THIS DOCUMENT SHOULD UNDERSTAND THE ASSUMPTIONS AND EVALUATE WHETHER THEY ARE APPROPRIATE FOR THEIR PURPOSES. SOME EVENTS OR CONDITIONS MAY NOT HAVE BEEN CONSIDERED IN SUCH ASSUMPTIONS. ACTUAL EVENTS OR CONDITIONS WILL VARY AND MAY DIFFER MATERIALLY FROM SUCH ASSUMPTIONS. READERS SHOULD UNDERSTAND SUCH ASSUMPTIONS AND EVALUATE WHETHER THEY ARE APPROPRIATE FOR THEIR PURPOSES. This presentation may include figures related to past performance or simulated past performance as well as forecasted or simulated future performance. Soluna disclaims any obligation to update their views of such risks and uncertainties or to publicly announce the results of any revision to the forward-looking statements made herein.

Use of Projections and Illustrations - this presentation contains certain financial forecasts and illustrations. Neither Soluna's nor Soluna's independent auditors have studied, reviewed, compiled or performed any procedures with respect to the projections for the purpose of their inclusion in this presentation. The material in this presentation is for illustrative purposes only and should not be relied upon as being necessarily indicative of future results.

In addition to figures prepared in accordance with U.S. Generally Accepted Accounting Principles ("GAAP"), Soluna from time to time presents alternative non-GAAP performance measures, e.g., EBITDA, adjusted EBITDA, Return on Invested Capital ("ROIC"), and Internal Rate of Return ("IRR"). For more information on the non-GAAP financial measures used in this presentation, please see the Appendix.

We are driving the convergence of renewable energy & advanced computing infrastructure.

Up to 40% of generated energy goes unused. Soluna's mission is to convert this unused energy into high performance computing, turning wasted power into value for AI and Bitcoin.

Renewable Energy has a wasted energy problem.

To reach their full potential AI & Bitcoin needs a sustainable energy source.

**RENEWABLE
COMPUTING**

Source: Soluna Curtailment Assessments of IPPs in Pipeline. Curtailment estimates from ISO/RTO websites. Wood Mackenzie.

Company Overview

AI is driving exponentially growing demand for compute

Miners prefer scalable, well-managed, and cost-advantaged hosting partners.

Soluna bridges this gap

Clean energy goes to waste due to curtailment

Co-locating data centers **behind the meter** at renewable power generation enables us to bypass long interconnection queues, improve power economics, and **accelerate time-to-market**.

Q3 Soluna Highlights ¹

INSTALLED HASHRATE

4.5 EH/s ²

AVERAGE POWER COST

**\$32.5 /
MWh ⁵**

CAPITAL RAISED in Q3

\$64 Million ⁴

AVERAGE J / TH/s

<26 J / TH/s ⁵

(1) As of September 30, 2025 unless otherwise noted

(2) Includes a mix of Prop Miners and Hosted Miners. Q3 2025, was a growth period, energization of Dorothy 2, and transition of customers at Sophie.

(3) Sophie (25 MW - operational) + Dorothy 1 (50 MW - operational) + Dorothy 2 (30 MW operational, 18 MW Construction) + Kati (83 MW Construction, 83 MW Shovel Ready) + Grace (2 MW - In Development) + Rosa (187 MW - In Development) + Ellen (100 MW - In Development) + Hedy (120 MW - In Development) + Annie (75 MW - In Development) + Fei (100 MW - In Development) + Gladys (150 MW - In Development), amounts are approximate

(4) Capital raised in Q3 2025 includes ATM \$20.8M, Warrants \$8.9M, SEPA \$4.2M, July 2025 Offering \$5.0M, SLC investment in Kati \$10.6M, SLC investment in D2 \$2.3M, Generate Debt draw for D1A \$5.5M, and Generate debt draw in D2 \$7.1M.

(5) Year-to-Date average (January 2025 - September 2025)

Our Strategy

Transform stranded clean energy into high-performance computing infrastructure.

~2.8GW
Power Pipeline

We sign PPAs and acquire land co-located with Renewable Energy projects with high curtailment.

Bitcoin

We develop, own and operate Bitcoin Hosting Data Centers.

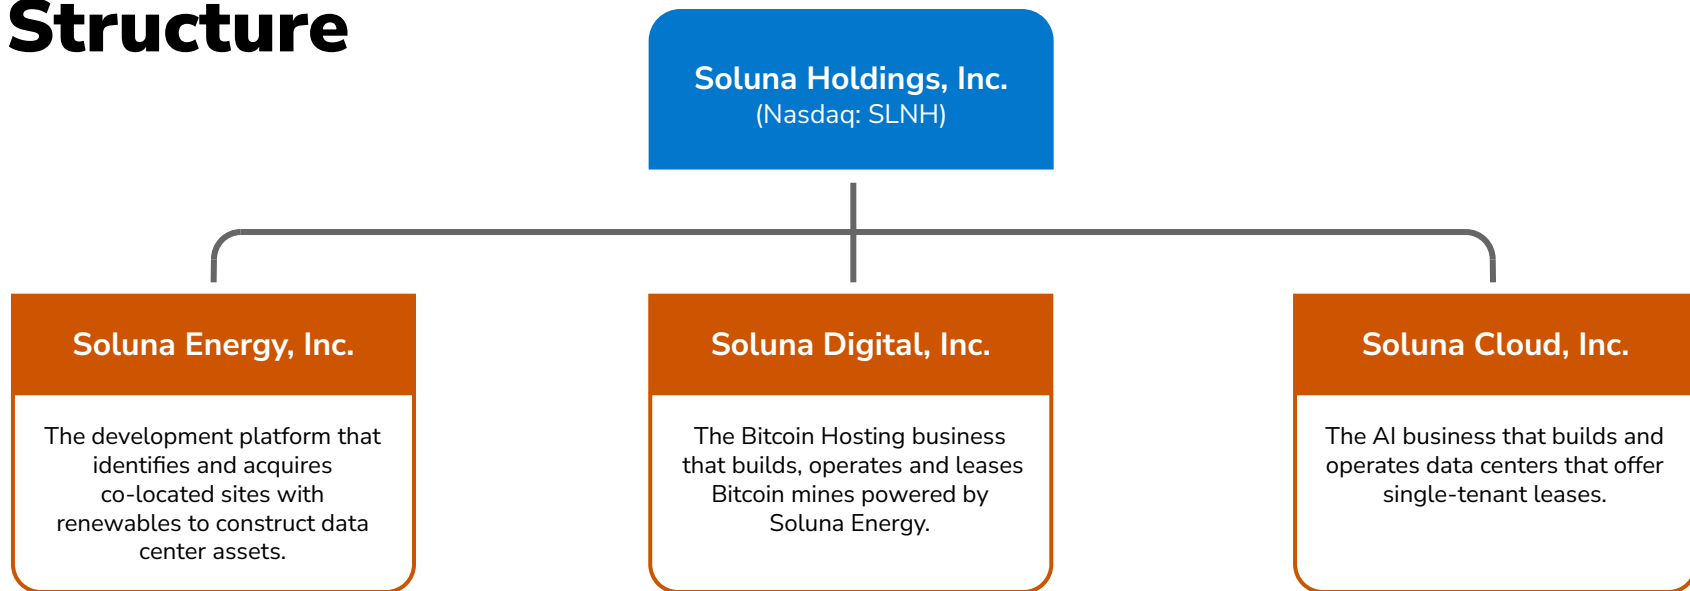

Renewable Computing

We make renewable energy a global superpower using computing as a catalyst.

AI

We develop AI data center projects and form JVs with data center operators (DCOs).

Soluna Organizational Structure

Business Segments

Diversified Revenue Streams

Prop Bitcoin Mining

- Soluna or JV owned Bitcoin mining machines
- *Bitcoin sold daily*
- *Soluna provides Managed Infrastructure Services*

High Performance Computing

- Colocation and hosting services for companies that need AI-ready data centers.
- *Soluna develops data centers with JV partners and provides Managed Infrastructure Services.*

Grid Ancillary Services

- Compensation to act as behind-the-meter flexible load for the grid
- *Paid on \$ / MWh basis by Utility or Grid Operator*

Hosting for Bitcoin Miners

- Third-party machines hosted at Soluna Data Centers
- *Soluna provides Managed Infrastructure Services*

SOLUNA 1GW+

Our Data Center Projects

We have over 1GW of data center capacity in operation, construction or development

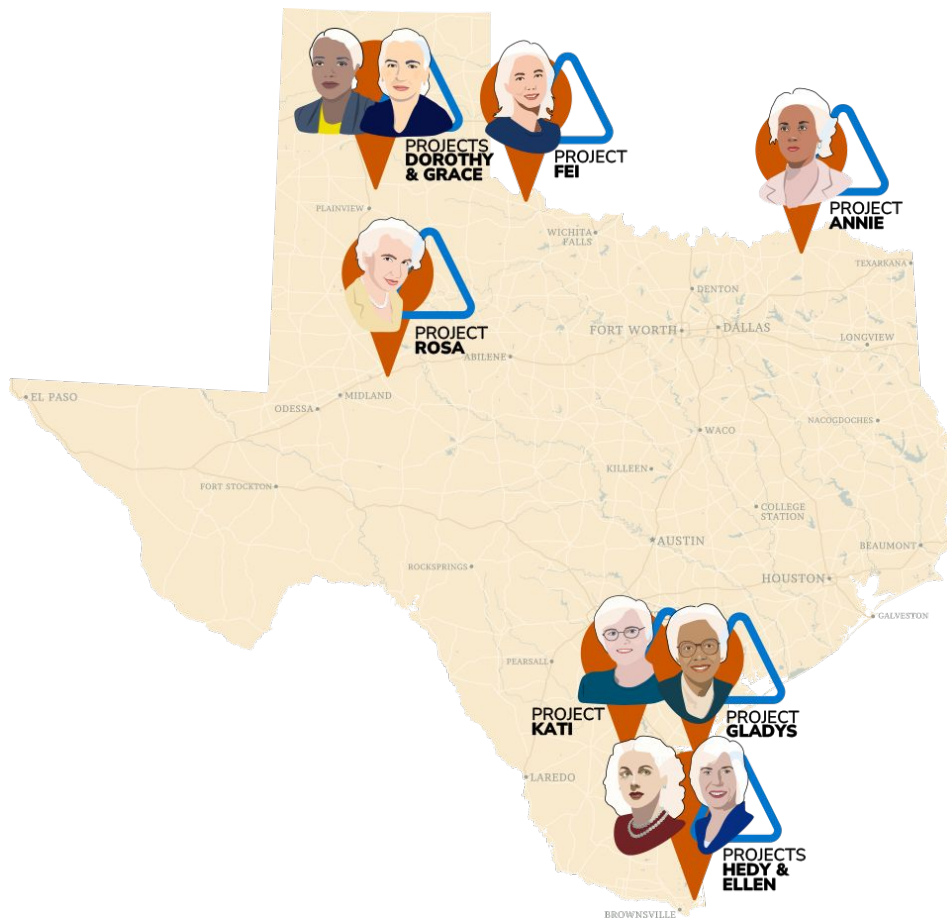

| ProjectA | Location | Power Source | Size (MW) | Model | Status ¹ | Power Cost | Partner(s) |
|------------|----------|--------------|-----------|------------------|---------------------|------------|-----------------------|
| Dorothy 1A | TX | Wind | 25 | BTC Hosting | Operating | \$35 | Spring Lane, Generate |
| Dorothy 1B | TX | Wind | 25 | BTC Mining | Operating | \$35 | Navitas |
| Sophie | KY | Grid | 25 | BTC Hosting | Operating | \$33 | N/A |
| Dorothy 2 | TX | Wind | 48 | BTC Hosting | Operating | \$35 | Spring Lane, Generate |
| Kati | TX | Wind | 166 | BTC Hosting / AI | Construction | \$40 | Spring Lane, Generate |
| Grace | TX | Wind | 2 | AI Hosting | Development | \$40 | TBD |
| Rosa | TX | Wind | 187 | BTC Hosting / AI | Development | \$40 | TBD |
| Hedy | TX | Wind | 120 | BTC Hosting / AI | Development | \$40 | TBD |
| Ellen | TX | Wind | 100 | BTC Hosting / AI | Development | \$40 | TBD |
| Annie | TX | Solar | 75 | BTC Hosting / AI | Development | \$40 | TBD |
| Fei | TX | Solar | 100 | BTC Hosting / AI | Development | \$40 | TBD |
| Gladys | TX | Wind | 150 | BTC Hosting / AI | Development | \$40 | TBD |

Note: (1) Development includes: PPA, Land Acquisition, Engineering & Regulatory Studies, ERCOT Planning.

Project Locations

Soluna has 1GW+ of Renewable Computing Projects in Texas. A major location for Bitcoin and AI data centers.

The proximity of several projects creates “clustering.” This potentially creates opportunities for larger data center campuses at our sites.

Energized Data Center Capacity and Growth

We are building the largest clean-energy-powered Bitcoin infrastructure platform.

| Year | Energy (MW) ¹ | Hashrate (EH/s2) ¹ |
|------|--------------------------|-------------------------------|
| 2023 | 25 | 1.0 |
| 2024 | 75 | 2.9 |
| 2025 | 129 | 5.8 |
| 2026 | 368 | 19.8 |
| 2027 | 696 | 46.4 |

(1) 2023 & 2024 Energy and Hashrate are actual, while 2025-2027 Energy are estimated based on expected project ramp (which could vary up or down) and 2025-2027 Hashrate are estimated as a ramp from about 25J/Th in 2023/2024 to about 15J/Th by 2027 (which also could vary up or down)

Illustrative Earnings Potential

Base case - \$55 Hashprice ³

Non-GAAP Financials

Substantial potential ramp of Consolidated Total Revenue and Adj. EBITDA^{1,2} driven by completion of the following projects:

- Dorothy 2
- Kati 1
- Additional Projects (illustrative model assume 2 similarly sized projects to Kati)

(1) Consolidated Adj. EBITDA is total company EBITDA, including any Soluna SG&A. (2) Soluna's ownership stake in each of the projects varies. See following slides for more details.

(3) Hashprice is a term created by Luxor Technology in 2019. It is a measure used in the Bitcoin mining industry to represent the revenue earned per unit of hashrate (usually per petahash per second, or TH/s). It is calculated by dividing the total daily mining revenue by the total network hash rate, giving an indication of the profitability of mining operations. Changes in Bitcoin price, network difficulty, and transaction fees all influence Hashprice. Actual Hashprice may vary substantially from illustrative modeled Hashprice.

(4) H2 is 2nd half or 3rd and 4th quarters of 2025

(5) See Appendix for management statements on non-GAAP measures.

Illustrative Earnings Potential

Upside case - \$75 Hashprice ³

Non-GAAP Financials

Additional \$20 of Hashprice vs. base case adds approximately \$35 million to annual Consolidated Total Adj. EBITDA^{1,2} by 2028.

(1) Consolidated Adj. EBITDA is total company EBITDA, including any Soluna SG&A.

(2) Soluna's ownership stake in each of the projects varies. See slides later in the presentation for more details.

(3) Hashprice is a term created by Luxor in 2019. It is a measure used in the Bitcoin mining industry to represent the revenue earned per unit of hashrate (usually per petahash per second, or TH/s). It is calculated by dividing the total daily mining revenue by the total network hash rate, giving an indication of the profitability of mining operations. Changes in Bitcoin price, network difficulty, and transaction fees all influence hashprice. Actual hashprice may vary substantially from illustrative modeled hashprice.

(4) H2 is 2nd half or 3rd and 4th quarters of 2025

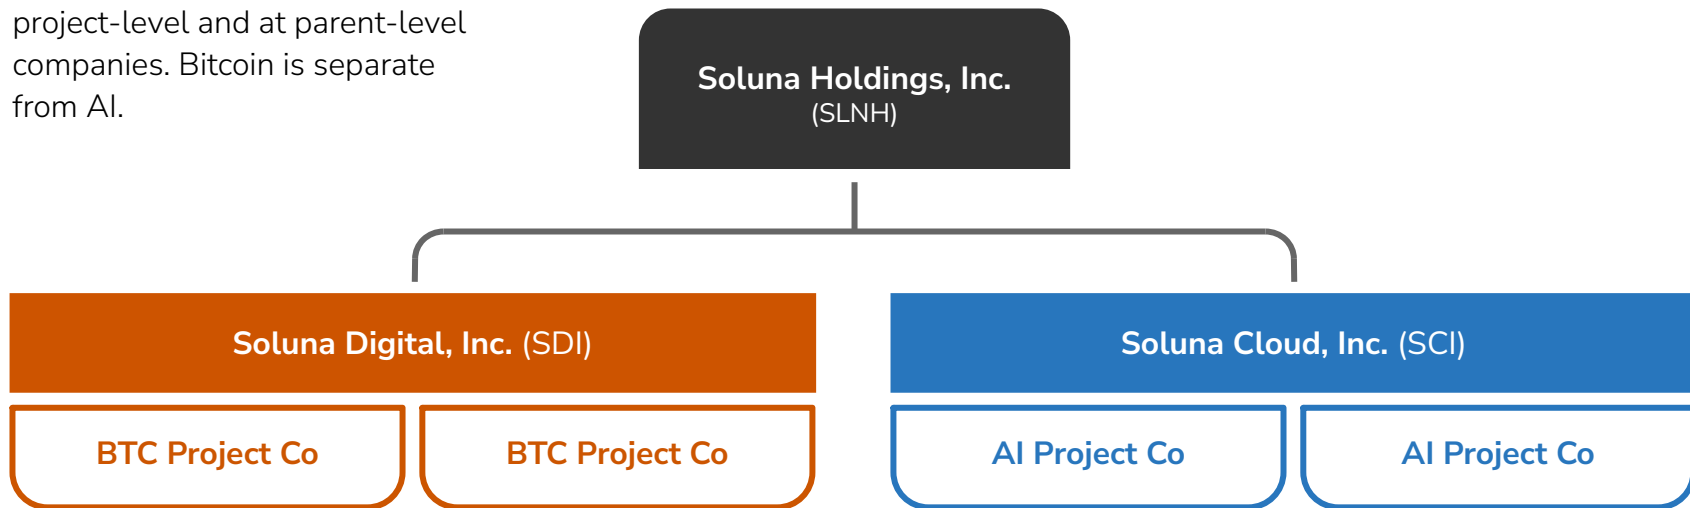

(5) See Appendix for management statements on non-GAAP measures.

Project Finance & Unit Economics

Our Corporate Structure Supports Flexible Capital Formation for Infrastructure

Capital formation occurs at project-level and at parent-level companies. Bitcoin is separate from AI.

Bitcoin Data Center Project ¹

Project Return on Invested Capital (ROIC ²)

- 44 months to return capital
- 34.9% IRR³
- 225% ROIC²

■ CAPEX
■ Net Cash Flow⁴

(1) Key assumptions: a) \$55 hashprice b) 95% availability c) 35MW capacity d) 10 years from initial energization to project recapitalization

(2) ROIC = Return on Invested Capital = sum of cumulative Net Cash Flow divided by sum of CAPEX

(3) IRR = Internal Rate of Return - discount rate that makes the net present value (NPV) of Net Cash Flow equal to \$0

(4) Net Cash Flow and CAPEX are consolidated Project Cash Flows

(5) Includes terminal value from asset sale of \$500k/MW after 10 years of operations

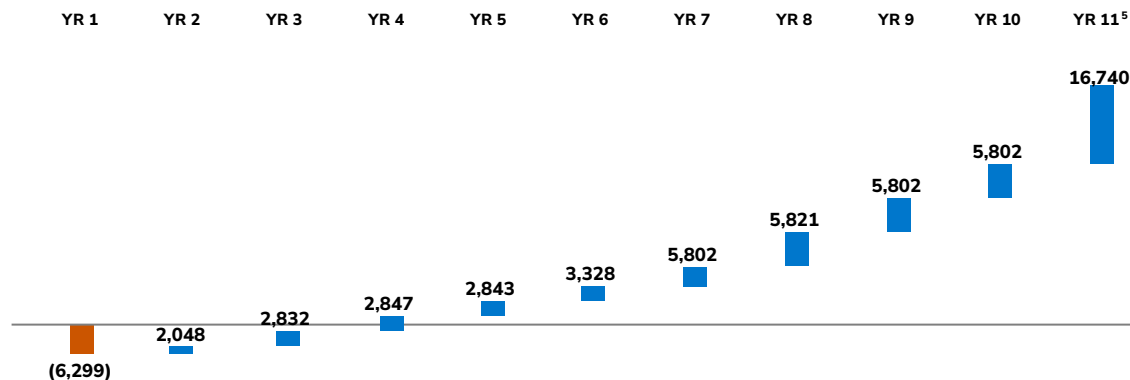

(6) See Appendix for management statements on non-GAAP measures.

Bitcoin Data Center Project ¹

Soluna ROIC ² (25% ownership)

- 38 months to return capital
- 50.1% IRR³
- 755% ROIC²

■ CAPEX
■ Net Cash Flow⁴

| | | | | | | | | | | | |
|-------------------|---|---|---|-------|-------|-------|-------|-------|-------|-------|-------|
| IRR ³ | — | — | — | 11.2% | 24.8% | 33.0% | 40.6% | 44.5% | 46.8% | 48.1% | 50.1% |
| ROIC ² | — | — | — | 23% | 68% | 121% | 213% | 305% | 397% | 489% | 755% |

(1) Key assumptions: a) \$55 hashprice b) 95% availability c) 35MW capacity d) 10 years from initial energization to project recapitalization

(2) ROIC = Return on Invested Capital = sum of cumulative Net Cash Flow divided by sum of CAPEX

(3) IRR = Internal Rate of Return - discount rate that makes the net present value (NPV) of Net Cash Flow equal to \$0

(4) Net Cash Flow and CAPEX are consolidated Project Cash Flows

(5) Includes terminal value from asset sale of \$500k/MW after 10 years of operations

(6) See Appendix for management statements on non-GAAP measures.

We finance our projects using a combination of **Project Level Equity and Debt**

| ProjectCo | Soluna Owner Equity | Spring Lane Owner Equity | Navitas Equity | Soluna Developer Profit "Pre-Flip" ⁵ | Soluna Developer Profit "Post-Flip" ⁶ | Debt |
|-------------------|---------------------|--------------------------|----------------|---|--|------|
| Dorothy 1A | 14.6% | 85.4% | - | 0% | 10%/50% ⁽¹⁾ | - |
| Dorothy 1B | 51% | - | 49% | n/a | n/a | - |
| Dorothy 2 | 0% ³ | 100% | - | 7.5% | 50% ⁽²⁾ | - |
| Sophie | 100% | - | - | n/a | n/a | \$5M |

(1) Soluna as Developer receives 0% of equity cash flows until equity owners achieve a 1.0x Multiple on Invested Capital ("MOIC"); thereafter, developer receives 10% of equity cash flows. Once equity owners achieve a 16% Extended Internal Rate of Return ("XIRR"), the developer's share increases to 50%.

(2) Soluna as Developer receives 7.5% of equity cash flows until equity owners achieve a 18% XIRR; thereafter, developer receives 50% of equity cash flows.

(3) Subject to ongoing capital formation and partner discussion, this could grow.

(4) See Appendix for management statements on non-GAAP measures.

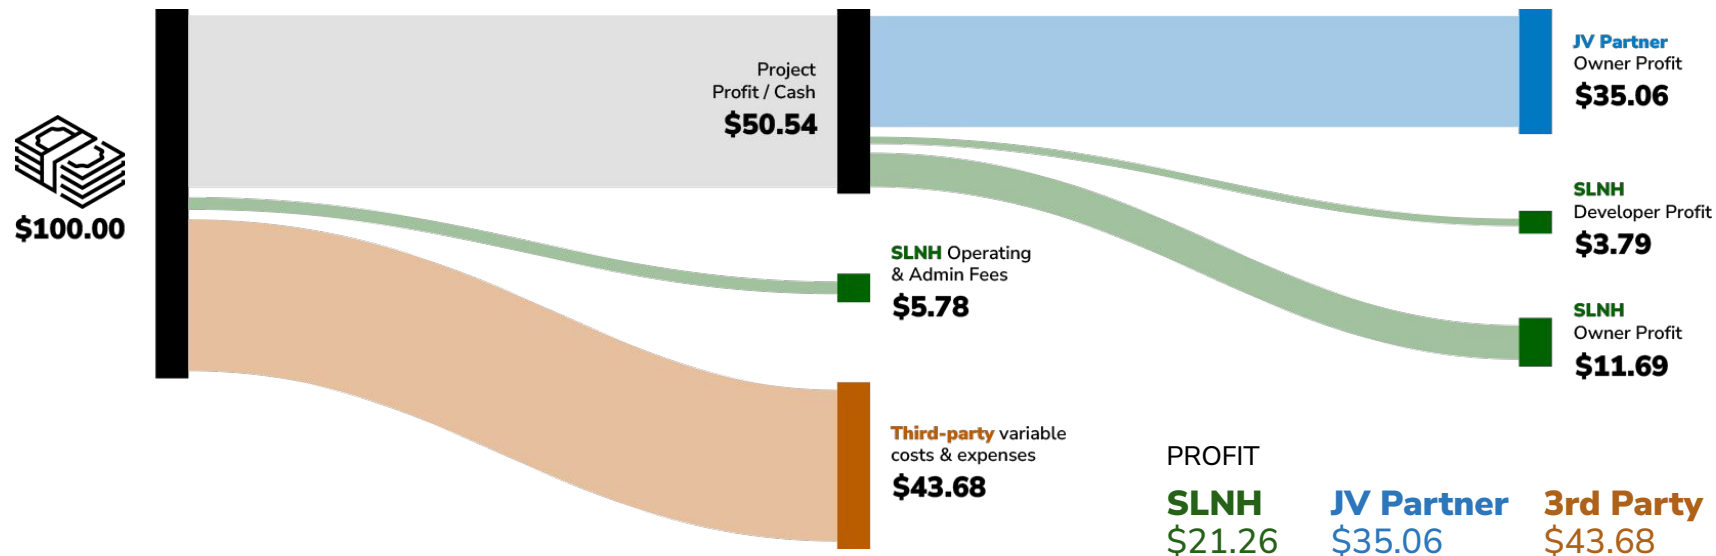

(5) "Pre Flip" refers to project timeline prior to reaching the JV partner target economics, at which time the % of developer profit increases to 50% of all project cash flow

(6) "Post Flip" refers to project timeline after reaching the JV partner target economics, at which time the % of developer profit increases to 50% of all project cash flow

Project Cash Flows

Bitcoin Hosting Pre Flip ^{1,2,3}

We make money from services fees, developer profit and our share of owner profit.

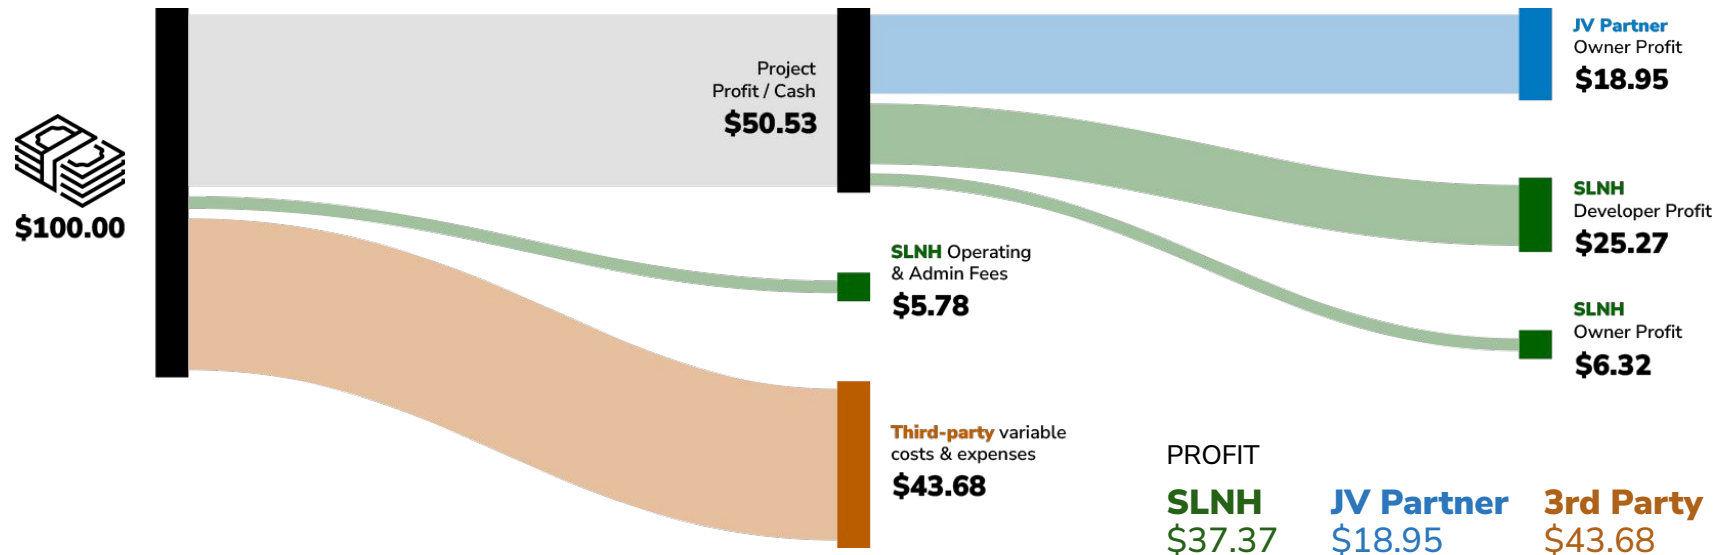

- (1) "Pre Flip" refers to project timeline prior to reaching the JV partner target economics, at which time the % of developer profit increases to 50% of all project cash flow
 (2) All values are indicative based on certain key assumptions which may vary from any actual project specifically
 (3) Key assumptions: a) 20% O&M margin and fixed Admin Fees; b) 7.5% Developer Profit; c) 25% / 75% Ownership SLNH / JV Partner
 (4) See Appendix for management statements on non-GAAP measures.

Project Cash Flows

Bitcoin Hosting Post Flip ^{1,2,3}

After the “Flip” our developer profit increases significantly.

- (1) “Pre Flip” refers to project timeline prior to reaching the JV partner target economics, at which time the % of developer profit increases to 50% of all project cash flow
 (2) All values are indicative based on certain key assumptions which may vary from any actual project specifically
 (3) Key assumptions: a) 20% O&M margin and fixed Admin Fees; b) 7.5% Developer Profit; c) 25% / 75% Ownership SLNH / JV Partner
 (4) See Appendix for management statements on non-GAAP measures.

Project Cash Flows

Bitcoin Prop Mining ^{1,2}

We make money from services fees and our share of owner profit.

(1) All values are indicative based on certain key assumptions which may vary from any actual project specifically
 (2) Key assumptions: a) 20% O&M margin and fixed Admin Fees; b) 51% / 49% Ownership SLNH / JV Partner
 (3) See Appendix for management statements on non-GAAP measures.

Summary of Existing Debt ¹

\$14.0m subsidiary debt (no Soluna Holdings guarantee);

\$10.1m GreenCloud debt (with Soluna Holdings guarantee)²

| Debt Tranche (Entity) / (Guarantor) | Total | Amort Remaining |
|--|-----------------|--------------------|
| GreenCloud (Cloud) / (Holdings) ³ | \$10,055 | ~2 years |
| Spring Lane Equipment (Dorothy 2) / (None) ⁴ | \$250 | n/a |
| Galaxy Digital (Sophie) / (Sophie Holdings) ⁵ | \$4,550 | ~4.75 years |
| Total Amortizing | \$14,855 | |
| NYDIG (Marie Borrowing) / (Marie) ⁶ | \$9,183 | n/a |
| Total | \$24,038 | |

(1) As of March 31st 2025, stated in \$ thousands unless otherwise noted

(2) Debt held at below listed entities with below listed guarantor(s), if applicable

(3) GreenCloud note (original principal \$12.5m, borrower Soluna AL CloudCo, LLC and guarantors Soluna Cloud, Inc. and Soluna Holdings, Inc., 3 year amortization from June 2024)

(4) Springlane Equipment note (\$250k related to Project Kati, borrower Soluna DVSL II ComputeCo, LLC and no guarantor, non amortizing, expected payoff upon Dorothy 2 completion or Kati project finance closing)

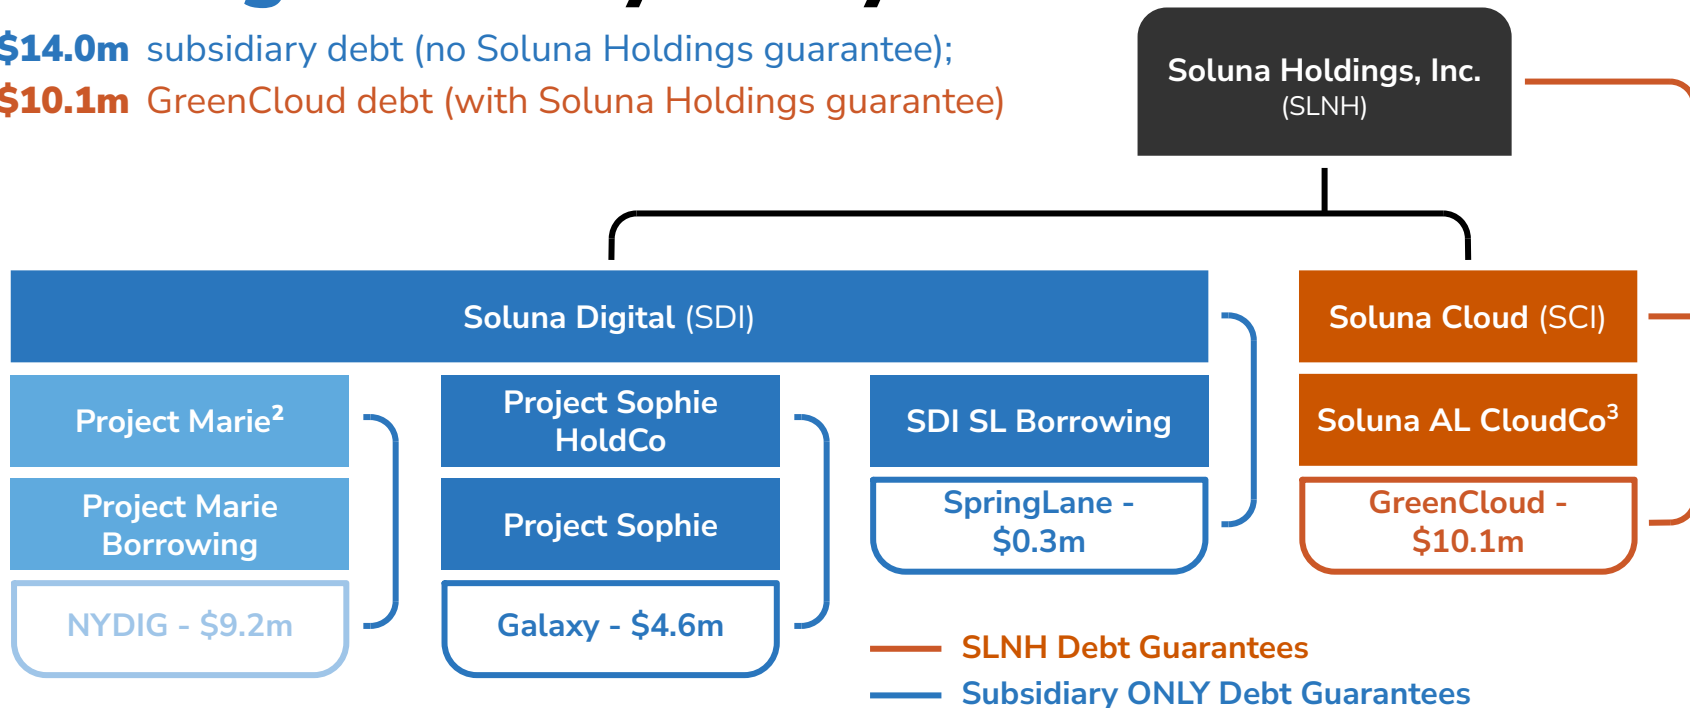

(5) Galaxy Digital note (original principal \$5.0m, borrower Soluna SW, LLC and guarantor Soluna SW Holdings, LLC, 5 year amortization from March 2025)

(6) NYDIG note (original principal of \$14.4, borrower Soluna MC Borrowings, LLC and guarantor Soluna MC, LLC, no longer amortizing, no operating assets)

Existing Debt ¹ By Entity

\$14.0m subsidiary debt (no Soluna Holdings guarantee);

\$10.1m GreenCloud debt (with Soluna Holdings guarantee)

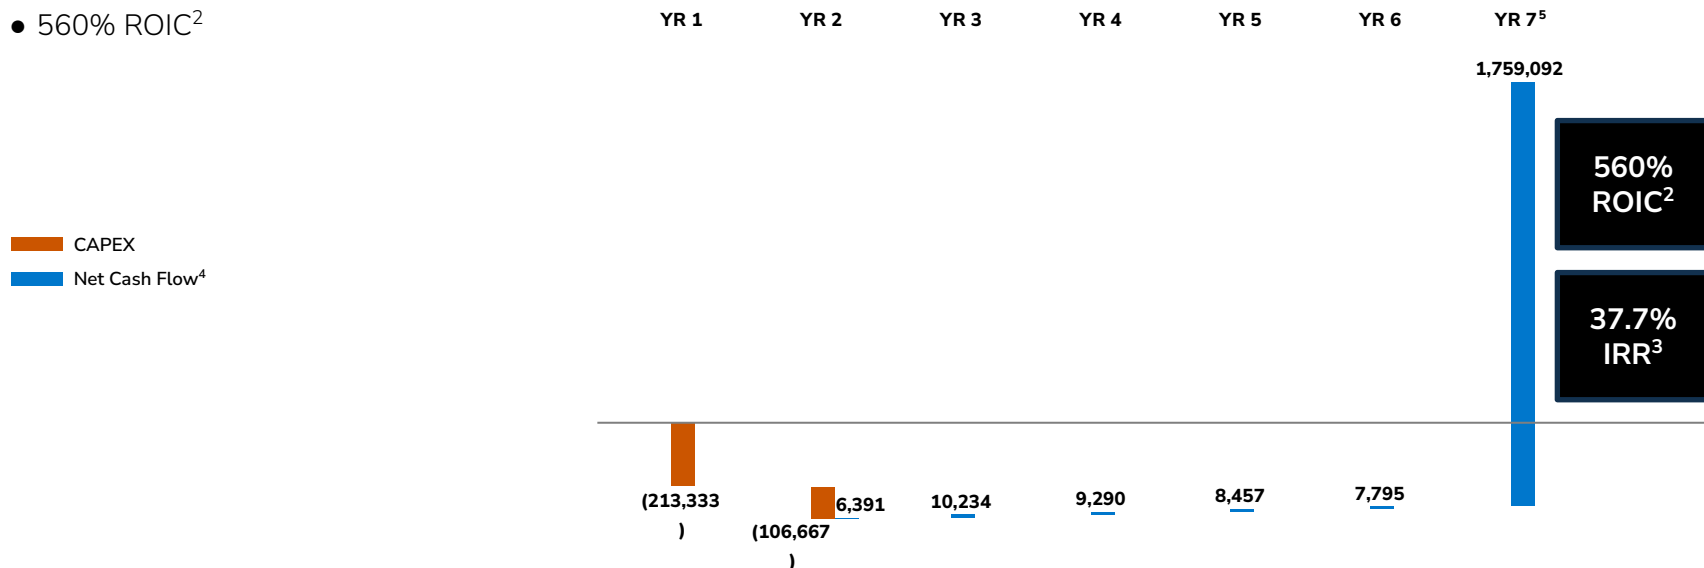

(1) See prior slide entitled "Summary of Existing Debt" additional notes that cover this slide.

(2) Project Marie data center was decommissioned and has no remaining assets.

(3) Soluna AL CloudCo has ceased operations and has no remaining assets.

AI / HPC Data Center Project ¹ ROIC²

- Capital is returned at refinance
- 37.7% IRR³
- 560% ROIC²

(1) Key assumptions: (a) Assumes 18-month build period and subsequent 5 years of operations. (b) Capitalized with non-amortizing, ROIC-based construction debt (~60% LTC, 3-year tenor), refinanced at month 12 into bullet term loan (SOFR + 375 bps, 5–10 year tenor) post-lease signing, (c) 100 MW gross capacity

(2) ROIC = Return on Invested Capital = sum of cumulative Net Cash Flow / divided by sum of CAPEX

(3) IRR = Internal Rate of Return - discount rate that makes the net present value (NPV) of Net Cash Flow equal to \$0

(4) Net Cash Flow and CAPEX are consolidated Project Cash Flows after debt service

(5) Includes terminal value from asset sale at 3x capex-build after 5 years of operations

(6) See Appendix for management statements on non-GAAP measures.

AI / HPC Data Center ¹ Soluna ROIC²

- Significant uplift to both IRR and ROIC, driven by equity uplift of delivering power and land to the project
- 58.5% IRR³
- 1,209% ROIC²

(1) Key assumptions: (a) Assumes 18-month build period and 5 years of operations. (b) Capitalized with non-amortizing, ROIC-based construction debt (~60% LTC, 3-year tenor), refinanced at month 12 into bullet term loan (SOFR + 375 bps, 5–10 year tenor) post-lease signing, (c) 100 MW gross capacity, (d) Assumes Soluna equity ownership of 11.1%
 (2) ROIC = Return on Invested Capital = sum of cumulative Net Cash Flow divided by sum of CAPEX
 (3) IRR = Internal Rate of Return - discount rate that makes the net present value (NPV) of Net Cash Flow equal to \$0
 (4) Net Cash Flow and CAPEX are consolidated Project Cash Flows after debt service
 (5) Includes terminal value from asset sale at 3x capex-build after 5 years of operations
 (6) See Appendix for management statements on non-GAAP measures.

Pipeline & Distinctives

The Perfect Storm: Driving Energy Demand

Historic Load Spike^{1,2}

Explosive load growth: U.S. utilities now forecast **50 GW of new generation needed by 2030.**

Unprecedented scale: Individual campuses now reach **100 MW–5 GW** each—comparable to small cities.

Infrastructure Bottlenecks^{3,4,5}

Interconnection queues exceed **2.6 TW** nationally.

Permitting and build times lag load arrival by **3–5 years.**

Equipment shortage with lead times exceeding **5 years.**

Grid Reliability Strained^{6,7,8,9}

DOE (2025) and NERC (2024 LTRA) warn of rising reliability risks without **major new generation and transmission.**

Policy response forming: FERC, ISO-NE, and states launching large-load forecasting rules and data-center reporting mandates.

AI Load Fluctuates: unprecedented load fluctuations.

Energy Arms Race^{1,2,6}

Unprecedented scale: CapEx is expected to grow to **\$1 trillion cumulatively** over the next **5 years** for energy utilities and **3 years** for hyperscalers.

National security lens: DOE frames large-load planning as critical infrastructure resilience.

China built 429 GW of capacity in 2024, **US only 50 GW.**

We have a growing pipeline of projects

2.8GW+ long-term pipeline with large IPPs and infrastructure funds in the US and beyond

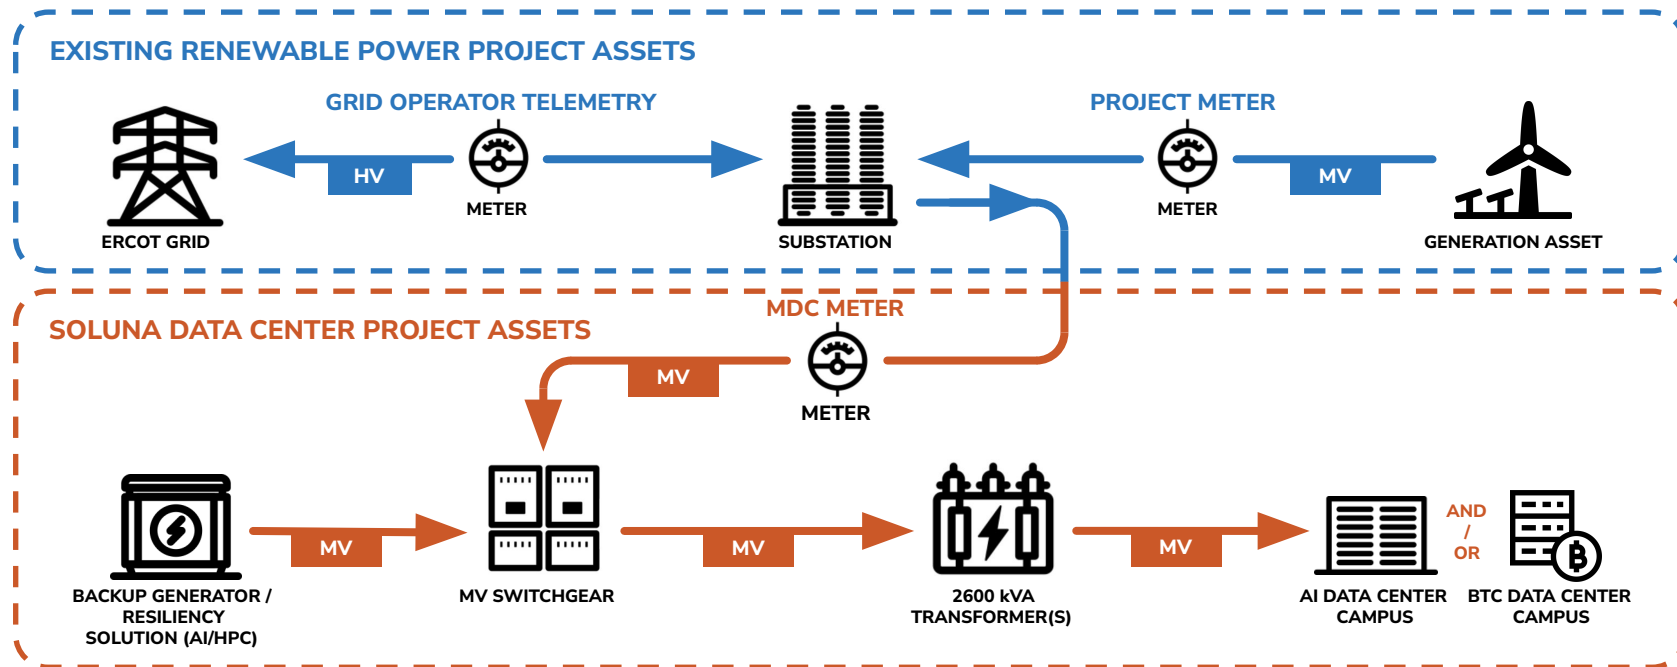

| | PROJECTS | MW |
|--|----------|-------|
| Total Long-Term Pipeline | 22 | 2,801 |
| Total Curtailment Assessment Completed (YTD) | 22 | 2,801 |
| Active Term Sheet Negotiations | 5 | 850 |
| Shovel Ready, PPA, or Signed Term Sheets | 6 | 698 |
| Average Data Center Project Size | | 150 |
| Total Power Partners | 13 | |
| Average Projects per Power Partner States | 2 | |

(1) Current operating hosting and mining projects.

Unique Interconnection Strategy

Behind-the-Meter Structure Allows Our Data Centers to Remain Flexible, Drawing Power from the Grid or Renewable Power Plant and Provide Ancillary Services. **Rapid Time to Interconnection.**

Maestro OS™ Is Our Force Multiplier

Our proprietary software streamlines site operations with intelligent monitoring, precise data, and full-stack automation—enabling faster decisions, higher uptime, and seamless grid integration.

Control

Extend equipment lifespan and reduce failures with built-in redundancies.

Fully automated and manual control of fans, miners, PDUs, power, and network systems for optimized performance.

Robust, redundant computing at both building and site levels to eliminate single points of failure.

Cloud-based simulator enables software and algorithm testing before deployment.

Data Collection

Comprehensive data collection across all PDU plugs, network, and power systems.

Aggregation of grid telemetry from multiple sources.

Post-processing of site and grid data to enable advanced analytics and insights.

High-fidelity hash rate and power data collection to support customer contracts and operations.

Operations

Real-time tracking of computing systems, PDUs, networking gear, and power systems enables centralized site management and remote diagnostics.

Comprehensive diagnostics and alerting system allows operators to detect issues and take immediate action.

Pinpoints the exact location of computing systems and equipment to quickly identify anomalies.

Power

Extensible architecture enables rapid adaptation of algorithms for seamless integration with various grid and behind-the-meter configurations.

Accepts multiple grid and power inputs to inform algorithm performance.

Fully compliant with ERCOT 4CP and other demand response protocols.

Automated compliance with PPA and ancillary service requirements.

Soluna's Distinctiveness

Behind the Meter (BTM) model captures stranded energy and eases grid congestion

Monetizing stranded power while reducing infrastructure stress

BTM model enables accelerated access to low cost power

Using existing substations and interconnections enables faster project timelines, simplified permitting, and rapid access to power

Flexible power design with redundant options for power

Tailored for resilient, flexible scalable BTM data center deployments for both AI and BTC

Proprietary software and proven execution

Significantly reduces project, technical and commercial risks for investors and partners

2025 Focus & Catalysts

2025 Corporate Focus

Grow Pipeline

Increasing the number of curtailment assessments completed with power partners, advancing more projects to shovel-ready status, and executing additional project term sheets.

Optimize Projects

Energize Project Dorothy 2. And enhancing the profitability, operational efficiency, and customer mix of our operating data centers, while improving overall customer satisfaction.

Capital Formation

Pursuing financing opportunities to support key growth initiatives, including Projects Kati and Rosa. Leveraging strength of project cash flows to refinance and/or pull forward value of existing projects and to deploy debt financing in new projects.

Develop AI

Form partnerships to harness the value of our considerable and growing pipeline by developing AI/HPC data center joint ventures. Building governance, advisory and employee AI/HPC expertise in support of expected growth strategy.

Our Accomplishments in 2025

as of November 2025

Business Milestones

- Raised **\$64M+** to fund growth
- Secured **\$20M** from Spring Lane Capital
- Secured **\$5M non-dilutive debt** from Galaxy Digital
- Closed **\$100M** credit facility with Generate Capital
- Launched **\$87M** ATM program
- Reached agreement with **NYDIG**
- Regained **Nasdaq listing compliance**
- Awarded **second patent**
- Exited **HPE partnership**
- Expanded partnerships with **Bit Digital, Compass Mining**, and top-tier miners
- Surpassed **4 EH/s** hash rate under management
- Added Projects **Gladys + Fei**, pushing portfolio past **1 GW** of clean computing projects

Project Milestones

- Project Kati (166 MW) **groundbreaking completed and construction is underway**
- Signed **48 MW** Galaxy Digital partnership at Kati
- **Dorothy 2 (48 MW)** completed, bringing the full Project Dorothy site (98 MW) to **full operation**
- Signed **20 MW** Canaan deployment for January 2026
- Signed **3.3 MW** partnership with KULR at Project Sophie
- **AI partnerships** for Projects Grace and Kati 2 underway
- **187 MW Rosa** land secured
- **120 MW Hedy** term sheet signed
- **100 MW Ellen** term sheet signed
- **75 MW Annie** — first solar-powered facility
- Long-term pipeline now **2.8 GW+**
- Monetized **160,739 MWh** of curtailed energy

(1) through May 2025

Energize Phase 3 (18 MW)
of Dorothy 2

Dorothy 2 Final

Company Overview

We unlock wasted renewable power, meet compute and energy demand and lighten the burden on the grid

Energy Supply-Demand is Imbalanced

30-40% of Renewable energy generation is stranded.

Grid is Constrained

Rising energy costs, slow interconnection timelines, and limited transmission capacity delay new power plants.

Exploding Compute Demand

BTC and AI/HPC workloads are driving massive, fast-changing energy needs with 26–36%¹ annual growth.

(1) The Computational Limits of Deep Learning, Thompson N et Al - 2022

Soluna operates data centers co-located with renewable power plants, turning their wasted energy into sustainable computing resources.

upgrades face too
many challenges
& take too long...

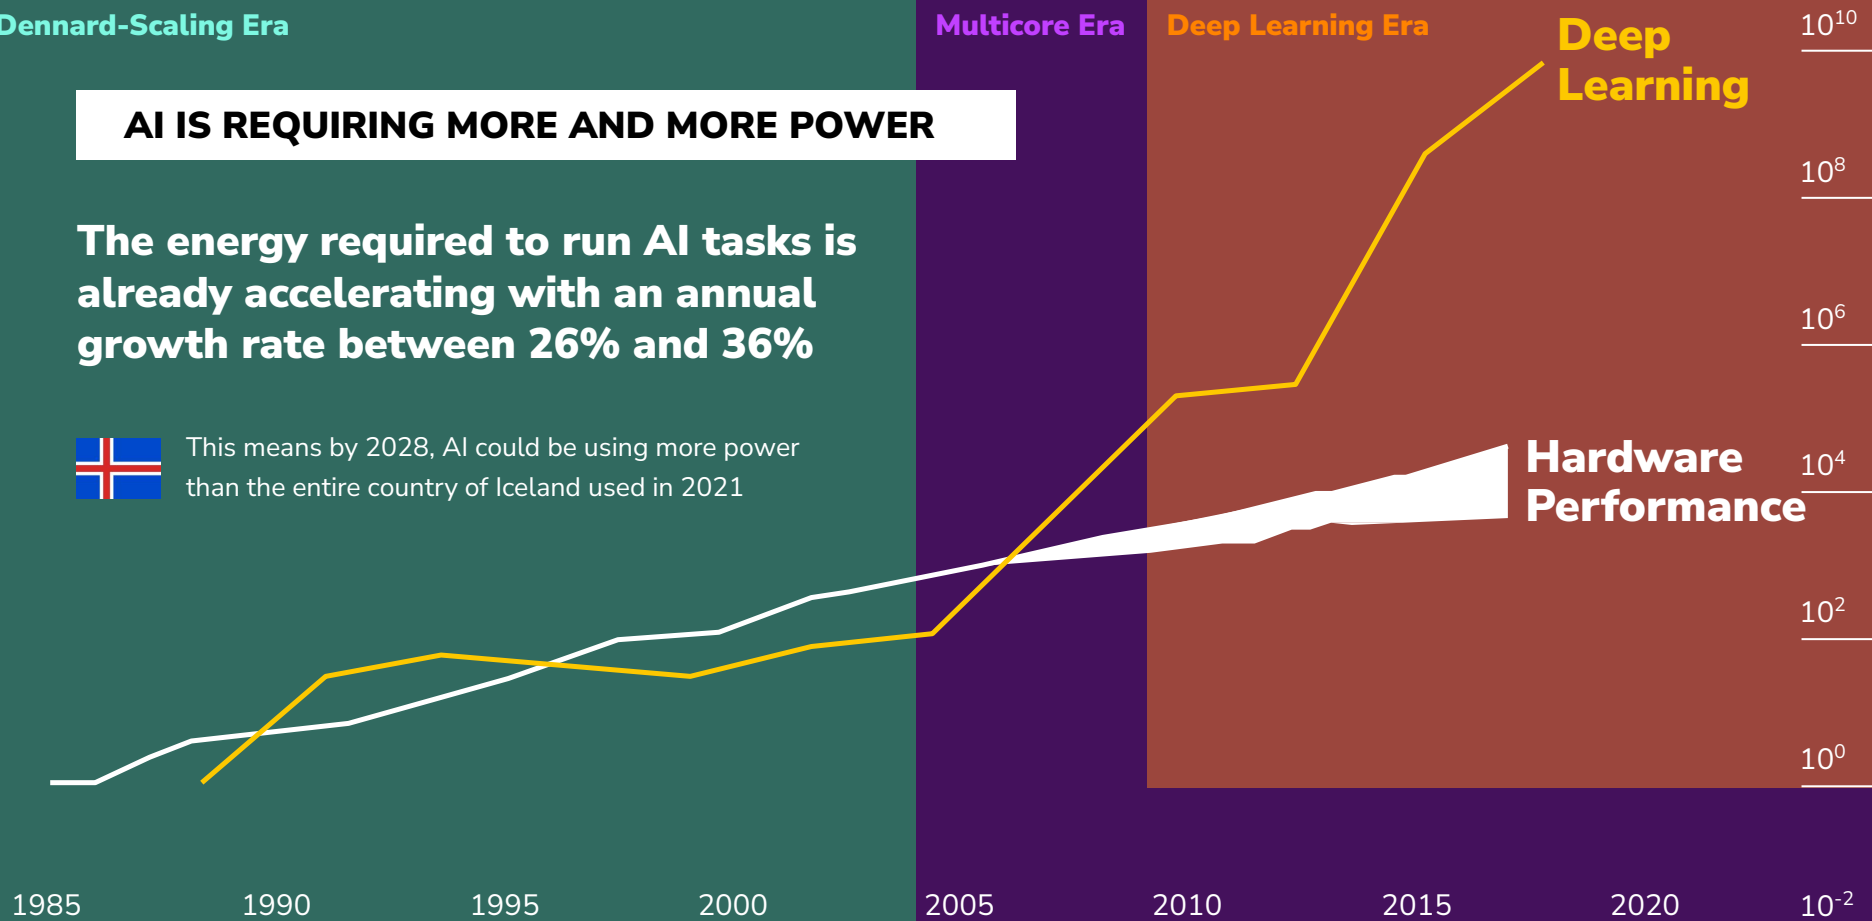

**Computing is
ready now.**

AI IS REQUIRING MORE AND MORE POWER

The energy required to run AI tasks is already accelerating with an annual growth rate between 26% and 36%

This means by 2028, AI could be using more power than the entire country of Iceland used in 2021

The Lifecycle of AI

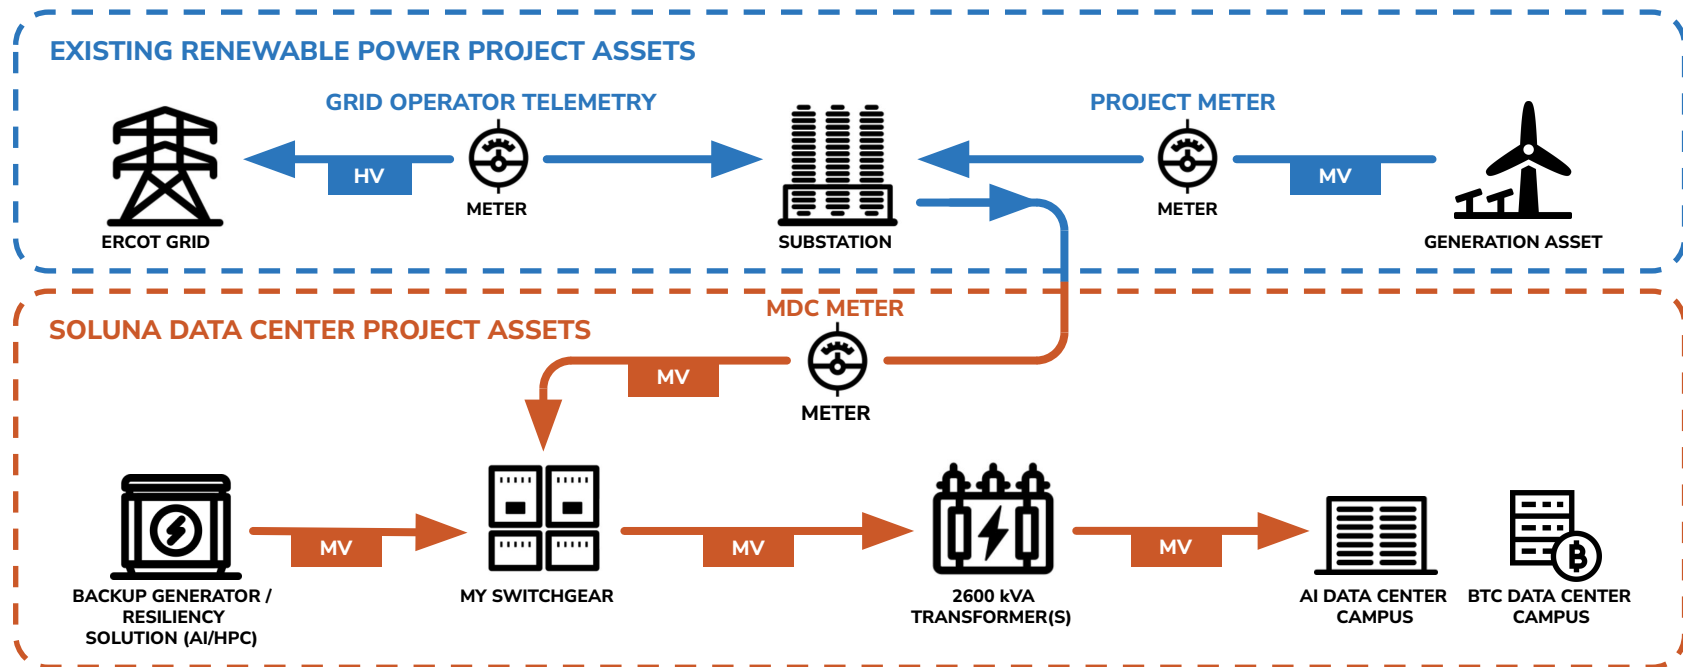

Gen AI is batchable: Parts of the Generative AI lifecycle are perfect computing applications for co-location with renewable power plants, because they are inherently batchable.

■ Batchable process
■ Real-time process

Unique Interconnection Strategy

Behind-the-Meter Structure Allows Our Data Centers to Remain Flexible, Drawing Power from the Grid or Renewable Power Plant and Provide Ancillary Services. **Rapid Time to Interconnection.**

How We Achieve Tier-3 Uptime Behind the Meter

Energy is sourced from the grid, the renewable power plant, and a resiliency solution.

Our Power Cost Is Among the Lowest In the Industry

Soluna's solution for grid and data center decarbonization

As new data-heavy applications drive massive energy demand, most data centers rely on carbon-intensive grids to power these workloads. While RECs are widely used to offset emissions, they often fail to reflect real-time energy usage and carbon impact.

We take a different approach by co-locating data centers with renewable power sources, directly consuming curtailed wind energy—power that would otherwise go to waste.

Our current data centers achieve a fraction of the emissions of a typical ATC data center. This model enables real emissions reductions while supporting the growth of renewable energy.

The Soluna Way

We tackle wasted energy through digital infrastructure. As we optimize the grid and serve our customers, we fuel our growth, funding further expansion to make renewable energy a superpower.

Bitcoin Hosting Contract Models

Profit Share -- Power pass-through + Opex passthrough fee + BTC profit share + service fees

Fixed Fee / Volumetric -- Fixed price on \$/kWh + services fees.

| Financial Driver | Fixed Fee/Volumetric | Profit Share |
|--------------------------------|----------------------|-------------------|
| Hash price up | no impact | gross profit up |
| Hash price down | no impact | gross profit down |
| Electricity up | gross profit down | gross profit down |
| Electricity down | gross profit up | gross profit up |
| Electricity in Revenue & Cost? | Yes | No |
| Gross Profit capped? | Yes | No |

Bitcoin Hosting Contract Mix Shift

Volumetric contracts at Dorothy more than doubled in Q2, up from 5MW in Q1 2025.

What Our Customers Are Saying

Partnering with Soluna has been a game-changer for Compass. Their commitment to operational excellence and partnership sets them apart as a hosting partner.

CJ Burnett

CPA, Compass Mining

Soluna is a real delight to work with. Their approach is professional, hands-on, and proactive. I trust them to handle any challenge with efficiency and provide solutions that consistently enhance our operations.

Dominick Binder

Senior Engineer, Bit Digital

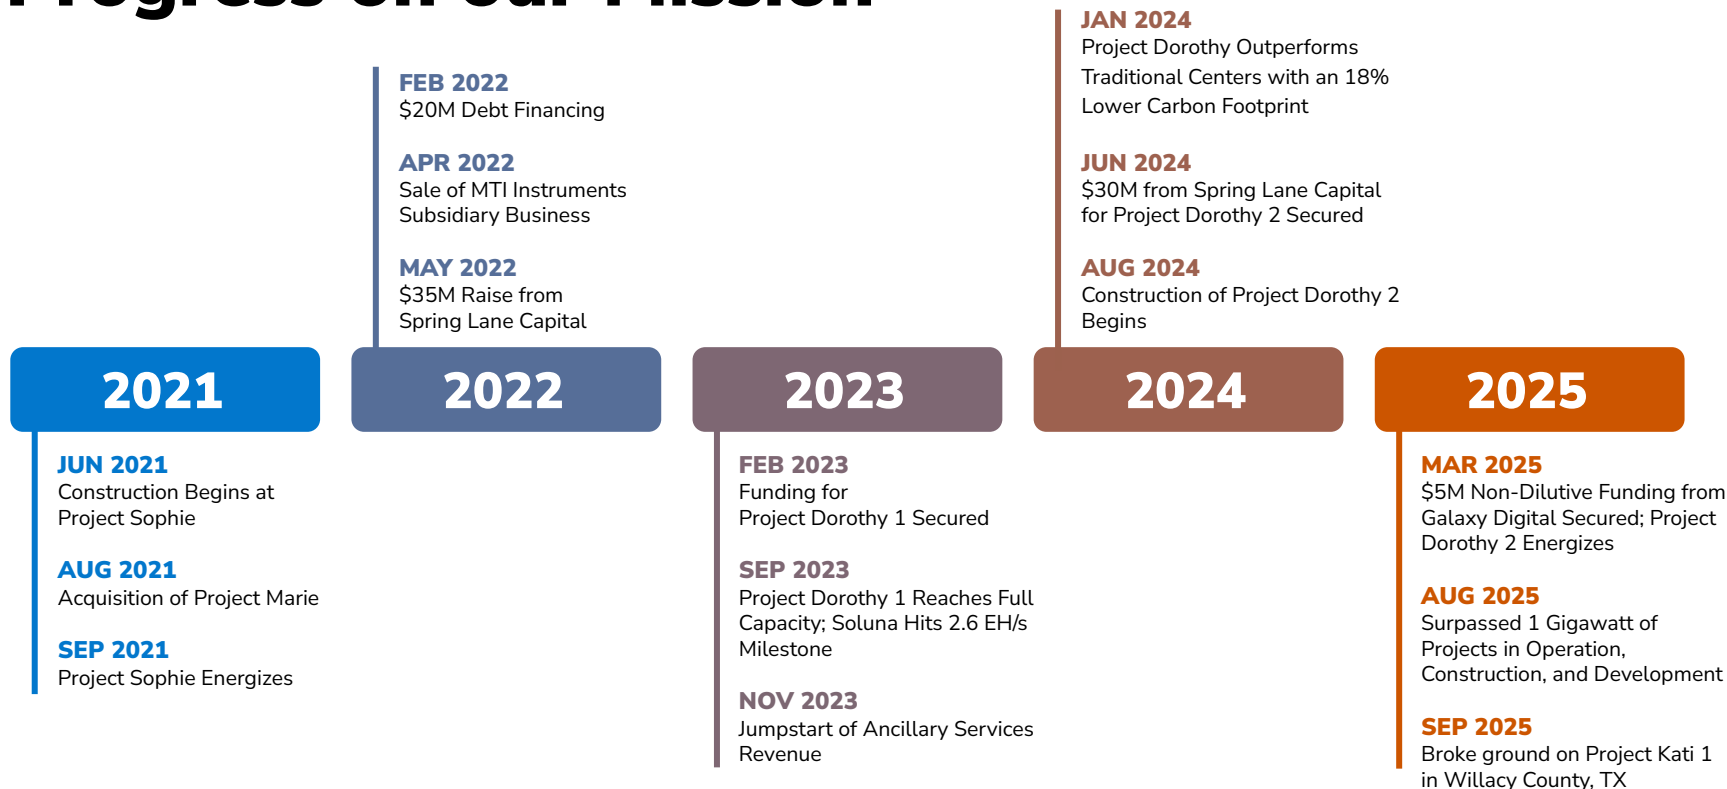

Soluna's expertise in optimizing mining operations has allowed BitMine to scale rapidly while maintaining a strong focus on sustainability and cost efficiency. They're more than just a hosting provider—they're a strategic partner.

Jonathan Bates

CEO, BitMine

Non-GAAP Measure

Management Definitions

This presentation contains various non-GAAP financial measures which are defined on the following slide, each of which is not calculated in accordance with GAAP. Presentations of these non-GAAP financial measures are intended to aid investors in better understanding the factors and trends affecting the Company's performance and liquidity. However, investors should not consider these non-GAAP financial measures as a substitute for financial measures determined in accordance with GAAP. The Company cannot reconcile these measures without unreasonable effort because certain items that impact net income and other reconciling metrics are out of the Company's control and/or cannot be reasonably predicted at this time. Other companies may define these terms in different ways. See our annual report on Form 10-K for the year ended December 31, 2024 for an explanation of how management uses EBITDA, adjusted EBITDA and other measures in its operations.

Non-GAAP Measure

Management Definitions

Consolidated Adjusted EBITDA: total EBITDA, as adjusted by management for certain one-time impacts, on a fully consolidated basis, regardless of actual Soluna ownership percentage.

Developer Profit: profit and cash paid to project developer from Project Profit/Cash.

EBITDA: Earnings Before Interest, Taxes, Depreciation, and Amortization: a measure of a company's operating performance that shows earnings before accounting for financing costs, tax expenses, and non-cash charges.

IRR – Internal Rate of Return: the discount rate that makes the net present value (NPV) of a series of cash flows equal to zero, reflecting the annualized rate of return earned on an investment.

MOIC – Multiple on Invested Capital: number of times the initial quantity of invested capital dollars that has been returned by distributions of project cash flows.

NPV – Net Present Value: the sum of the present values of all expected future cash flows from an investment, minus the initial investment cost, used to assess profitability.

O&M Margin, Operating & Admin Fees: fees (and margin) paid to Soluna as the developer for ongoing operations, maintenance and administrative services provided to projects.

Owner Profit: profit and cash paid to project owners from Project Profit/Cash after paying Developer Profit.

Project Profit/Cash: profit and cash available to project owners after paying 3rd party expenses and O&M (Operating) / Admin Fees.

ROIC – Return on Invested Capital: percentage of the initial quantity of invested capital dollars that has been returned by distributions of project cash flows.

SOFR – Secured Overnight Financing Rate: is a benchmark interest rate that reflects the cost of borrowing cash overnight using U.S. Treasury securities as collateral and is published daily by the Federal Reserve Bank of New York.

Soluna SG&A – Soluna Selling, General & Administrative: expenses incurred that are not directly attributable to operating projects, excluding stock compensation, impairment expense, and other miscellaneous non-cash expenses but including other income/expense.

Variable Costs & Expenses: costs of revenue and direct expenses that, when subtracted from project revenue, yield Project Profit/Cash.

XIRR – Extended Internal Rate of Return: the annualized rate of return for a series of cash flows occurring at irregular intervals.
